## 【Introduction】 History of Com.chair

When we visited to the shelter just after the 2011 Japan Earthquake and Tsunami, we watched such severe refuge life as people sit down on hard floor directly. At that time, we thought to make chair give relaxation and healing to victims. Therefore we developed Com.chair.

“Com”is communication. By painting on the chair, the thought of the person who draws reaches mind and body of the person sitting down, and the warm link is born between both. We put such a wish.

## [BASIC INFORMATION] How to draw, how to make the Com.chair

Com.chair is a chair shaped canvas. There are the following methods 1. and 2. to draw a picture. Since it is necessary to draw while thinking about balance and layout, for children, it becomes training of the drawing is conscious of space.

It is also a joint manufacturing process to assemble Com chairs. Children can learn craft while enjoying it.

### 1. Drawing on miniatures of Com.chair

Draw a picture on a miniature of Com.chair. And convert it into data, print it on the cover of the chair.

It is a size suitable for drawing, so you can devise and complete it by yourself.

### 2. Drawing on a Com.chair itself

Draw a picture directly on crayons, magic, watercolors etc on the real Com.chair with a plain cover.

Because the area is wide, it is also effective to draw by several people.

### 3. Assembling a Com.chair

The Com.chair hollows out the parts from flat cardboard and assembles it by fitting without using screws or glue.

There is fun to make like a plastic model.

# [BASIC INFORMATION] Features and Specifications of Com.chair

## Features of Com.chair

The Com.chair has a structure covered with corrugated cardboard cover with cushion, it is possible to draw pictures and letters, print pictures and photographs that were converted to data clearly. Such Com.chair has the following five features.

1. Apparent impact is great, and it is engraved strongly in memory by sitting
2. By combining multiple, various expressions and displays become possible
3. Because of light material, easy to move and effectively utilize space
4. Since it is given fireproofing, can be used for events
5. Chairs and covers can be replaced, reused them many times

## Specifications of Com.chair

Size	W520mm × D870mm × H660mm
Weight	5kg
Withstanding Load	100kg
Structural Elements	flame proofing corrugated cardboard
Cover Elements	polyester with flame proofing & repellency
Cushion Elements	urethane foam

## **[WORKS]** Children Who Drew Pictures

As the first of the project, we had children who live in two disaster areas draw the pictures. One of is SOMA CITY in FUKUSHIMA, the other is ISINOMAKI CITY in MIYAGI.  
In both areas the local NPO groups take care of children. We introduce them.

### ☆NPO “Fureai support-kan, Atelier” [SOMA,FUKUSHIMA]

Founded as painting the school for children in 1966.

They aim to provide a place where everyone can live vividly in relation to the local society, and it became a corporate NPO in 2003.

Main activities include creative activities such as painting classes, and nature experience activities such as camping, and more day service work for the elderly.

### ☆NPO “Nijiuro Crayon” [ISHINOMAKI, MIYAGI]

Just after the Japan Earthquake and Tsunami on March 22, 2011, they formed the "Ishinomaki Children Shelter Club" to fulfill the care of the affected children.

Established NPO corporation "Nijiuro Crayon" in September 2012. They are doing various recreational activities in many temporary residential areas, mainly painting and making things.
